

Supplementary File 3

Standardised 28-field data-extraction form

The pre-specified extraction schema applied to each of the 28 included studies. Every field was independently verified against the source PDF before the data row entered the corpus.

#	Field name	Content
1	Order	Sequential corpus identifier (1-28)
2	PMID	PubMed unique identifier
3	Title	Full article title
4	Year	Year of publication
5	Source	Origin in screening workflow (Stage 1 / Stage 2 / Stage 3)
6	Modality	CT, MRI, PET, SPECT, Ultrasound, X-ray, Mammography, Digital pathology
7	Anatomical_Region	Organ or body region (lung, liver, breast, brain, prostate, etc.)
8	Clinical_Task	Binary classification / Multi-class / Prognostic (with endpoint specified)
9	Cohort_Train	Training set sample size
10	Cohort_Internal_Test	Internal test set sample size
11	Cohort_External_Test	External test set sample size, or '-' if not present
12	External_Validation	YES if external cohort present, otherwise NO
13	FM_Name	Pretrained model identity (BiomedCLIP, RadImageNet, ResNet50, etc.)
14	FM_Pretraining	Pretraining corpus provenance (ImageNet, PMC-15M, SA-1B, etc.)
15	FM_Usage_Mode	Zero-shot / Linear probe / Fine-tune / Frozen feature extractor
16	Radiomics_Package	PyRadiomics / MIRP / CERR / IBEX / LIFEx / MaZda / Other
17	Texture_Families	GLCM / GLRLM / GLSZM / GLDM / NGTDM / NGLDM (all reported)
18	N_Features_Radiomics	Total number of radiomic features extracted
19	ML_Head	Downstream classifier (LR / RF / SVM / XGBoost / Cox PH / NN / etc.)
20	FM_Arm_Metric	Performance metric for FM arm (AUC / Accuracy / C-index / F1)

2 1	FM_Arm_Value	Numeric value of FM-arm metric (best-performing FM arm)
2 2	Rad_Arm_Metric	Performance metric for radiomics arm
2 3	Rad_Arm_Value	Numeric value of radiomics-arm metric
2 4	Metric_Difference	FM_Arm_Value minus Rad_Arm_Value (computed)
2 5	Stat_Comparison	Head-to-head statistical test (DeLong / bootstrap / permutation / p-value)
2 6	RQS_Score	Radiomics Quality Score (Lambin 2017), 0-36 (Phase 4b)
2 7	CLAIM_Score	CLAIM percentage of 42 items met (Mongan 2020) (Phase 4b)
2 8	PROBAST_Rating	PROBAST overall risk of bias (High / Unclear / Low) (Phase 4b)
2 9	Code_Available	URL to code repository, or 'Not reported'
3 0	Data_Available	URL to data, or 'Not reported'
3 1	Funding	Funding source(s) declared by authors
3 2	COI	Conflicts of interest declared by authors
3 3	Notes	Free-text caveats: multi-arm comparisons, secondary endpoints, external-test details

Multi-arm handling: For studies reporting multiple foundation-model arms, the best-performing arm (highest test-set AUC) was selected as the primary comparator and entered in fields 20-21. Multi-arm details were captured in field 33 (Notes).
